PROFESSIONAL SUMMARY

Motivated CS undergraduate and Full-Stack Developer with hands-on project experience building scalable web applications using React.js, Node.js, Python (FastAPI), and PostgreSQL/MongoDB. Proven ability to design and consume RESTful APIs, implement JWT authentication, and deliver data-driven features. Eager to contribute to a collaborative engineering team as a Junior Software Developer, with a strong aptitude for learning new frameworks and writing clean, maintainable code.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript (familiar), Python, C, C++, Java, PHP
Frontend: React.js, Next.js, HTML5, CSS3
Backend: Python FastAPI, RESTful API Design, JWT Authentication
Databases: PostgreSQL, MySQL, MongoDB — CRUD operations & schema design
Tools & Practices: Git, GitHub, Postman, Jira, Agile/Scrum, Debugging, System Design Basics
Design: Figma, Canva

WORK EXPERIENCE

Grader — United International University *Jun 2023 – Sep 2023*

- Evaluated programming assignments and exam scripts with focus on correctness, code quality, and logic
- Provided structured feedback to students, helping identify and resolve logical errors in their code
- Collaborated with faculty to maintain consistent grading standards across multiple course cohorts

PROJECTS

LifeOS — Personal AI Productivity System | *Tech: Python (FastAPI), PostgreSQL, Groq AI API, JWT*

- Engineered a full-stack REST API platform with secure JWT authentication and optimized CRUD operations
- Built task and expense management modules with dynamic data visualizations for real-time user insights
- Integrated Groq AI to enable natural language querying over user data (e.g., spending trend analysis)
- Designed scalable PostgreSQL schemas to support complex relational data across multiple modules

Cafe Delivery Management System | *Tech: React.js, Node.js, MongoDB*

- Built a complete full-stack delivery platform with user-facing UI, admin panel, and database integration
- Implemented full CRUD operations and end-to-end order processing workflows
- Designed scalable MongoDB schemas for managing users, orders, and delivery logistics

Gym Management System | *Tech: React.js, Node.js, MongoDB*

- Developed responsive React frontend with integrated backend APIs for membership management
- Designed database schemas to support user profiles and subscription lifecycle workflows
- Improved UX through dynamic UI updates and efficient asynchronous data handling

Gender Bias Detection in AI Mental Health Chatbots | *Tech: Python, NLP*

- Conducted quantitative analysis of gender bias in AI chatbot responses using structured experimental design
- Developed automated evaluation pipelines to measure bias across multiple response dimensions

EDUCATION

B.Sc in Computer Science and Engineering — United International University (UIU) *2022 – 2026*
Major: Data Science | CGPA: 3.4 / 4.00

ACHIEVEMENTS & CERTIFICATIONS

- 3rd Runner Up — UIU CSE Project Show (Database Management System)
- CCNA: Introduction to Networks — Cisco Certified
