PROFESSIONAL SUMMARY

Motivated CSE graduate and Full-Stack Developer with hands-on project experience building scalable web applications using React.js, Node.js, Python (FastAPI), and PostgreSQL/MongoDB. Proven ability to design and consume RESTful APIs, implement JWT authentication, and deliver data-driven features. Experienced in working across the full software development lifecycle — from gathering and documenting requirements to implementation and testing. Eager to contribute to a collaborative team in both development and business analysis capacities, with a strong aptitude for learning new frameworks, clear technical communication, and writing clean, maintainable code.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), Python, C, C++, Java, PHP, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Chart.js

Backend & APIs: FastAPI, RESTful API Design, JWT Authentication

Databases: PostgreSQL, MySQL, MongoDB — CRUD operations & schema design

Tools & Practices: Git, GitHub, Postman, Jira, ClickUP, Kaggle, Agile/Scrum, Debugging, System Design Basics

Design: Figma, Canva

PROJECTS

LifeOS — Personal AI Productivity System | *Python (FastAPI), PostgreSQL, Groq AI API, JWT*

- Engineered a full-stack REST API platform with secure JWT authentication and optimized CRUD operations
- Built task and expense management modules with dynamic data visualizations for real-time user insights
- Integrated Groq AI to enable natural language querying over user data (e.g., spending trend analysis)
- Designed scalable PostgreSQL schemas to support complex relational data across multiple modules

AI Job Application Tracking System | *React.js, Tailwind, FastAPI, Supabase, Groq LLM API*

- Built an AI-powered job tracking platform with job analysis, CV matching, and cover letter generation
- Used LLM APIs to extract structured insights (skills, experience, company, salary) from job descriptions
- Added CV parsing (PDF/DOCX) and one-click job saving with structured data storage

Gender Bias Detection in AI Mental Health Chatbots | *Python, NLP*

- Conducted quantitative analysis of gender bias in AI chatbot responses using structured experimental design
- Developed automated evaluation pipelines to measure bias across multiple response dimensions

Cafe Delivery Management System | *React.js, Node.js, MongoDB*

- Built a complete full-stack delivery platform with user-facing UI, admin panel, and database integration
- Implemented full CRUD operations and end-to-end order processing workflows
- Designed scalable MongoDB schemas for managing users, orders, and delivery logistics

WORK EXPERIENCE

Grader — United International University *Jun 2023 – Oct 2023*

- Evaluated programming assignments and exam scripts with focus on correctness, code quality, and logic
- Provided structured feedback to students, helping identify and resolve logical errors in their code
- Collaborated with faculty to maintain consistent grading standards across multiple course cohorts

EDUCATION

B.Sc in Computer Science and Engineering — United International University (UIU) *2022 – 2026 | Graduated*

Major: Data Science | CGPA: 3.4 / 4.00

ACHIEVEMENTS & CERTIFICATIONS

- 3rd Runner Up — UIU CSE Project Show (Database Management System)
- CCNA: Introduction to Networks — Cisco Certified
